Mariel van Tatenhove	Vice President, Marketing and Business Development
Thomas Spade	Vice President, Worldwide Sales
Robert Blazer	Vice President, Operations

## TECHNOLOGY

Validity's patented LiveFlex® Technology is the foundation for developing fingerprint sensors with the highest levels of performance, durability, cost-effectiveness, and manufacturing flexibility.

- LiveFlex® supplies superior image quality with high-frequency RF imaging into the live layer of the finger
- LiveFlex® solves durability issues by separating the fingerprint sensor from the silicon die, combined with a Kapton® plastic surface that is extremely resilient
- LiveFlex® resolves fundamental cost challenges, while maintaining excellent image quality
- LiveFlex® is the only solution that provides a flexible form factor and small footprint, providing maximum flexibility for OEM product integration

## VISION

"To be the leader in enabling secure and reliable access to personal information for anyone, anywhere"

## MISSION

"To provide the most convenient, secure and reliable fingerprint authentication solutions for information, communication and entertainment devices."

## SOFTWARE PARTNERS

- Bio-Key
